## About the CJRSC – the Washington SAC

Statistical Analysis Centers (SAC) are found across the nation in 51 states and territories. As the Washington SAC, the Criminal Justice Research & Statistics Center (CJRSC) is responsible for collecting, analyzing, and reporting public safety and criminal justice related statistics to federal, state, and local levels of government. We also facilitate the sharing of state-level information nationally. The information produced by SACs and their involvement in criminal justice projects is critical to local, state, and federal criminal justice agencies and community organizations as they develop programs and policies related to crime, illegal drugs, victim services, and the administration of justice.

SACs play a vital role in developing criminal and juvenile justice policy at the state and local levels. Their research provides evidence that policymakers use to guide their decision-making. By furthering the use of evidence-based practices in their states, SACs promote the effective and efficient administration of criminal and juvenile justice.

## Abstract

The Washington State Criminal Justice Data Book (CJDB) provides a comprehensive and integrated view of Washington's criminal justice system by combining data from multiple state agency sources into a centralized resource available through CrimeStats Online. As a product of the Criminal Justice Research and Statistics Center (CJRSC) – the Washington State Statistical Analysis Center (SAC), housed within the Office of Financial Management (OFM)'s Public Safety Policy and Research Center (PSPRC), the CJDB serves as an essential resource for understanding trends, patterns, and outcomes across the criminal justice system.

The purpose of this report is to serve as a reference guide for the CJDB by documenting each dataset and topic, identifying its data source, explaining what it measures, and providing important notes regarding definitions, methodology, and interpretation.

## Data Reference

**County population estimates** are produced by the Washington State Office of Financial Management. County populations include the sum of all inhabitants within a county. Individual county age and sex populations are based on the 1990, 2000 and 2010 censuses. The statewide population estimates are calculated by a cohort-component model that uses vital statistics and migration estimates. The county-specific populations, by age and sex, are developed from the state's age and sex structure and individual county trends. County populations, by age category, may not sum to the reported total due to rounding.

**Reported crime statistics** include The Uniform Crime Report's Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS). The Summary Reporting System (SRS) has been a national method of collecting Uniform Crime Reporting statistics for the FBI since the 1930s. The National Incident-Based Reporting System (NIBRS) was developed in the 1980s to illustrate the volume, diversity and complexity of crime more effectively than the original SRS method. Washington state became certified to begin submitting NIBRS data to the FBI in December 2006.

As of 2013, the Washington Association of Sheriffs and Police Chiefs started reporting data collected by NIBRS. Until 2019, when the SRS report was phased out, both the SRS and the NIBRS data were provided. The only counties reporting via SRS as of 2012 were King, Whatcom, Thurston, Spokane, Snohomish and Pierce. NIBRS data cannot be compared to SRS data due to the disparate methods of reporting – including counting offenses and the hierarchy rule. As of 2017, the SRS no longer includes arrests for adults and juveniles in its data and 2018 is the final reporting year for the SRS.

- **The Summary Reporting System (SRS):** Washington Association of Sheriffs and Police Chiefs (WASPC) collects monthly *reported crime statistics* from participating law enforcement agencies. The agencies participate on a voluntary basis as part of the Federal Bureau of Investigation's Uniform Crime Reporting program. County annual totals include the sum of all reported UCR crime index offenses known to participating agencies within the county and reported to WASPC. SRS index crimes are recorded in a hierarchical fashion. Only the most serious crime is counted whenever multiple offenses are committed in a single incident. Given this "hierarchy rule," and the fact that many crimes, especially less serious ones, go unreported, the crime index necessarily under-represents the true volume of crimes committed. Nevertheless, the index is a useful indicator of the volume and types of crimes reported to police. The SRS includes the following offenses:
  - **Aggravated Assault** - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.
  - **Arson** - The willful or malicious burning, or attempt to burn, with or without intent to defraud,

- a dwelling house, public building, motor vehicle or aircraft, personal property of another.
  - **Burglary** - The unlawful entry, or attempted entry, of a structure to commit a felony or a theft.
  - **Murder** - The willful killing of one person by another or the killing of another person through gross negligence. Also includes the non-violent offense of Controlled Substance Homicide.

  - **Rape** - The carnal knowledge of a female forcibly and against her will. Also includes attempts to commit forcible rape.
  - **Robbery** - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or the threat of force or violence and/or by putting the victim in fear.
  - **Theft** - The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another.
- **National Incident-Based Reporting System (NIBRS):** Washington Association of Sheriffs and Police Chiefs (WASPC) collects monthly *reported incident-based offense statistics* from participating law enforcement agencies. The Agencies participate on a voluntary basis as part of the Federal Bureau of Investigation's Uniform Crime Reporting program. County annual totals include the sum of all reported NIBRS offenses known to participating agencies within the county and reported to WASPC. **Reported juvenile arrest statistics** are collected monthly by The Washington Association of Sheriffs and Police Chiefs (WASPC) from law enforcement agencies participating as part of the Federal Bureau of Investigation's Uniform Crime Reporting program. Data are reported via two programs: the Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS). Until 2019, when the SRS report was phased out, both the SRS and the NIBRS data were provided. The only counties reporting via SRS as of 2012 were King, Whatcom, Thurston, Spokane, Snohomish, and Pierce. NIBRS data cannot be compared to SRS data due to the disparate methods of reporting – including counting offenses and the hierarchy rule. County totals include the sum of all arrests made by individual law enforcement agencies within the county. Juvenile arrests include the total number of persons under age 18 arrested, cited, or summoned to appear in a court of law. A separate report is made for each criminal arrest but not for each criminal charge. Arrests, like reported crimes, are recorded in a hierarchical fashion where only the most serious crime is counted. Therefore, while a person arrested more than once is counted each time, each arrest is counted only once regardless of the number of crimes that may have been committed. The SRS arrest data is no longer available after 2016 and the final reporting year for all SRS data is 2018.

Disposition information does not reflect the number of crimes for which offenders have been convicted. Dispositions imposed by courts of limited jurisdiction, misdemeanor sentences, and sentencing options are included. All juvenile confinement terms are served consecutively; therefore, the average of both minimum and maximum disposition lengths are based on the total of all the minimum and maximum terms on the disposition. The average minimum or maximum disposition length may not reflect actual time served in jail. Average minimum and maximum juvenile disposition lengths include the same categories as juvenile dispositions.

**Reported adult arrest statistics** are collected monthly by the Washington Association of Sheriffs and Police Chiefs (WASPC) from law enforcement agencies participating as part of the Federal Bureau of Investigation's Uniform Crime Reporting program. **Superior Court filings** are collected from the County Superior Court Clerk by the Administrative Office of the Courts. A superior court filing is the initiation of a case in court by formal submission to the court of a document alleging the facts of a matter and requesting relief. A separate case filing occurs for each criminal offender defendant. The majority of felony filings are recorded electronically in the Superior Court Management Information System (SCOMIS). Court filings are recorded based on the month and year in which they are filed. They do not include information on juvenile cases unless the juvenile defendant is transferred to adult court for all subsequent proceedings. Criminal offender filings are categorized by the most serious original charge against the defendant in the following order:

- **Assault** - Cases where the primary charge involves assault or intent to cause another person physical harm, including malicious harassment and coercion.
- **Drug Crimes** - Cases where the primary charge involves violation of the Uniform Controlled Substances Act or violation of regulations regarding prescription drugs.
- **Homicide** - Cases where the primary charge involves murder, manslaughter, excusable homicide, or justifiable homicide.
- **Motor Vehicle Theft** - Cases where the primary charge involved motor vehicle theft.
- **Other Felony** - Cases where the primary charge involves a felony which is not specifically defined above.
- **Property Crimes** - Cases where the primary charge involves theft of property (other than a motor vehicle), possession of stolen property, extortion, burglary, criminal trespass and taking a motor vehicle without permission.

**Jail population statistics** are collected from county operated jails, adult holding and detention facilities by the Washington Association of Sheriffs and Police Chiefs (WASPC). County correctional facilities report jail statistics, on a voluntary basis, as part of WASPC's Jail Booking and Reporting System (JBRS). Jail population statistics are recorded as the Average Daily Population (ADP) and include only those jail inmates held by the reporting agency and does not include offenders participating in non-custodial programs or held in another facility, but under the jurisdiction of the reporting agency. Participating agencies also report the current capacity of jail facilities. Due to a collection process change at WASPC, as of fiscal year 2011, pretrial and post-trial data will no longer be available. Jail ADP is reported by three categories:

- **Capacity** - Capacity is defined as the original design capacity plus or minus capacity changes resulting from building additions, reductions, or revisions.
- **Pre-trial ADP** - The average daily population of inmates who are awaiting trial or have not been adjudicated in a court of law. (Last data available 2011)
- **Post-trial ADP** - The average daily population of inmates who have been adjudicated in court and are serving a felony or misdemeanor sentence or awaiting transportation to a State correctional facility. (Last data available 2011)
- **Other ADP** - Average daily population of inmates not identified as pre-trial or post-trial. (Last data available 2006)
- **Total ADP** - Average daily population of all offenders in jail. Pre- and Post-trial ADP may not equal Total ADP due to individual jail inmate classification differences and program changes.
- **Note that a county's average daily population in jail may include offenders being held or serving sentences for crimes committed in other counties.**

**Prison admission statistics** are collected by the Department of Corrections (DOC) and reported by DOC's Research & Data Analytics section. Prison admissions include the number of convicted offenders admitted to state correctional facilities, and exclude admissions to state community correction programs. Admissions are reported in DOC's Offender Management Network Information System and are reported in four categories:

- **New admission** - A first time admission to prison.
- **Other** - Any other admission to prison, such as other state admissions, county boarders, and returns from bond.
- **Parole/CCI violations** - An admission to prison for violating conditions of parole (pre-Sentencing Reform Act) or community custody, but who have not necessarily committed a new offense.
- **Readmission** - An admission to prison of a person previously admitted and released from DOC and then readmitted for a new sentence.

**Felony jail and prison sentences** are reported by County Superior Court Clerks to the Caseload Forecast Council. Sentencing inflation does not reflect the number of crimes for which offenders have been convicted. Sentences imposed by courts of limited jurisdiction, misdemeanor sentences, death sentences, life without the possibility of parole sentences, and sentencing options for minor offenders are not included. A jail sentence is a court ordered incarceration term of 12 months or less and a prison sentence is a term of more than 12 months (or a prison DOSA sentence with less than a year). Sentences

do not include information on juvenile cases unless the juvenile defendant has been sentenced in superior court as an adult. The reported categories are used by the Department of Corrections and the Caseload Forecast Council for forecasting purposes and are not identical to classifications under the Sentencing Reform Act of 1981. For example the Sex Crime category includes pornography and prostitution offenses, which are not classified as sex offenses per se under the Sentencing Reform Act.

- **Assault** - Sentences for crimes that involve an assault or intent to cause another person physical harm. Also includes malicious harassment and coercion, kidnapping, and vehicular assault.
- **Burglary** - Sentences for crimes that involve the unlawful entry or attempt of a structure to commit a felony or a theft including burglary 1 and 2, and residential burglary.
- **Drug Crime** - Sentences for crimes that involve violations of the Uniform Controlled Substances Act or regulations regarding prescription drugs. Includes dealing and possession sentences.
- **Manslaughter** - Sentences for crimes that involve the killing of one person by another through gross negligence. Also includes vehicle homicide.
- **Murder** - Sentences for crimes that involve the willful killing of one person by another or the killing of another person.
- **Other Crime** - Sentences where the primary charge involves a felony that is not specifically defined in one of the other categories.
- **Other Property** - Sentences for crimes that involve of property, arson, forgery, possession of stolen property, criminal trespass, and taking a motor vehicle without permission.
- **Robbery** - Sentences for crimes that involve theft of property by the use of force, violence, fear of injury to a person or his or her property, and extortion.
- **Sex Crimes** - Sentences for crimes that involve sexual exploitation of a minor, incest, rape, statutory rape, indecent liberties, prostitution, pornography related crimes.
- **Total** - Total number of sentences for all offenses.
- **Unknown** - Sentences where the primary charge is unknown.

**Average Felony Jail and Prison Sentence Lengths** are calculated by the Caseload Forecast Council based on sentencing information. The average sentence lengths are computed for all felony convictions, excluding life and death sentences. The average sentence length is equal to the average of all sentence length, by offense category, ordered by the court and may not reflect actual time served in jail or prison. Average felony jail and prison sentence lengths include the same categories as Felony Jail and Prison sentences, in addition to the following:

- **Average Sentence** - Average sentence for all offenses
- **Note that sentences that involve multiple offenses or multiple types of offenses are classified according to the offense with the longest sentence length issued.**
