

Justice Data Warehouse

How the JDW Connects Washington's Justice System

The Justice Data Warehouse (JDW) integrates administrative data from selected sources across the justice system to support research, analysis, and reporting that can inform policy, program evaluation, and decision-making.

The JDW includes data from the following agencies and systems. Coverage varies by source, data type, and time period.

Washington State Patrol (WSP)
Computerized Criminal History (CCH)

Washington Association of Sheriffs and Police Chiefs (WASPC) Jail Booking Reporting System (JBRS)

Washington State Administrative Office of the Courts (AOC)

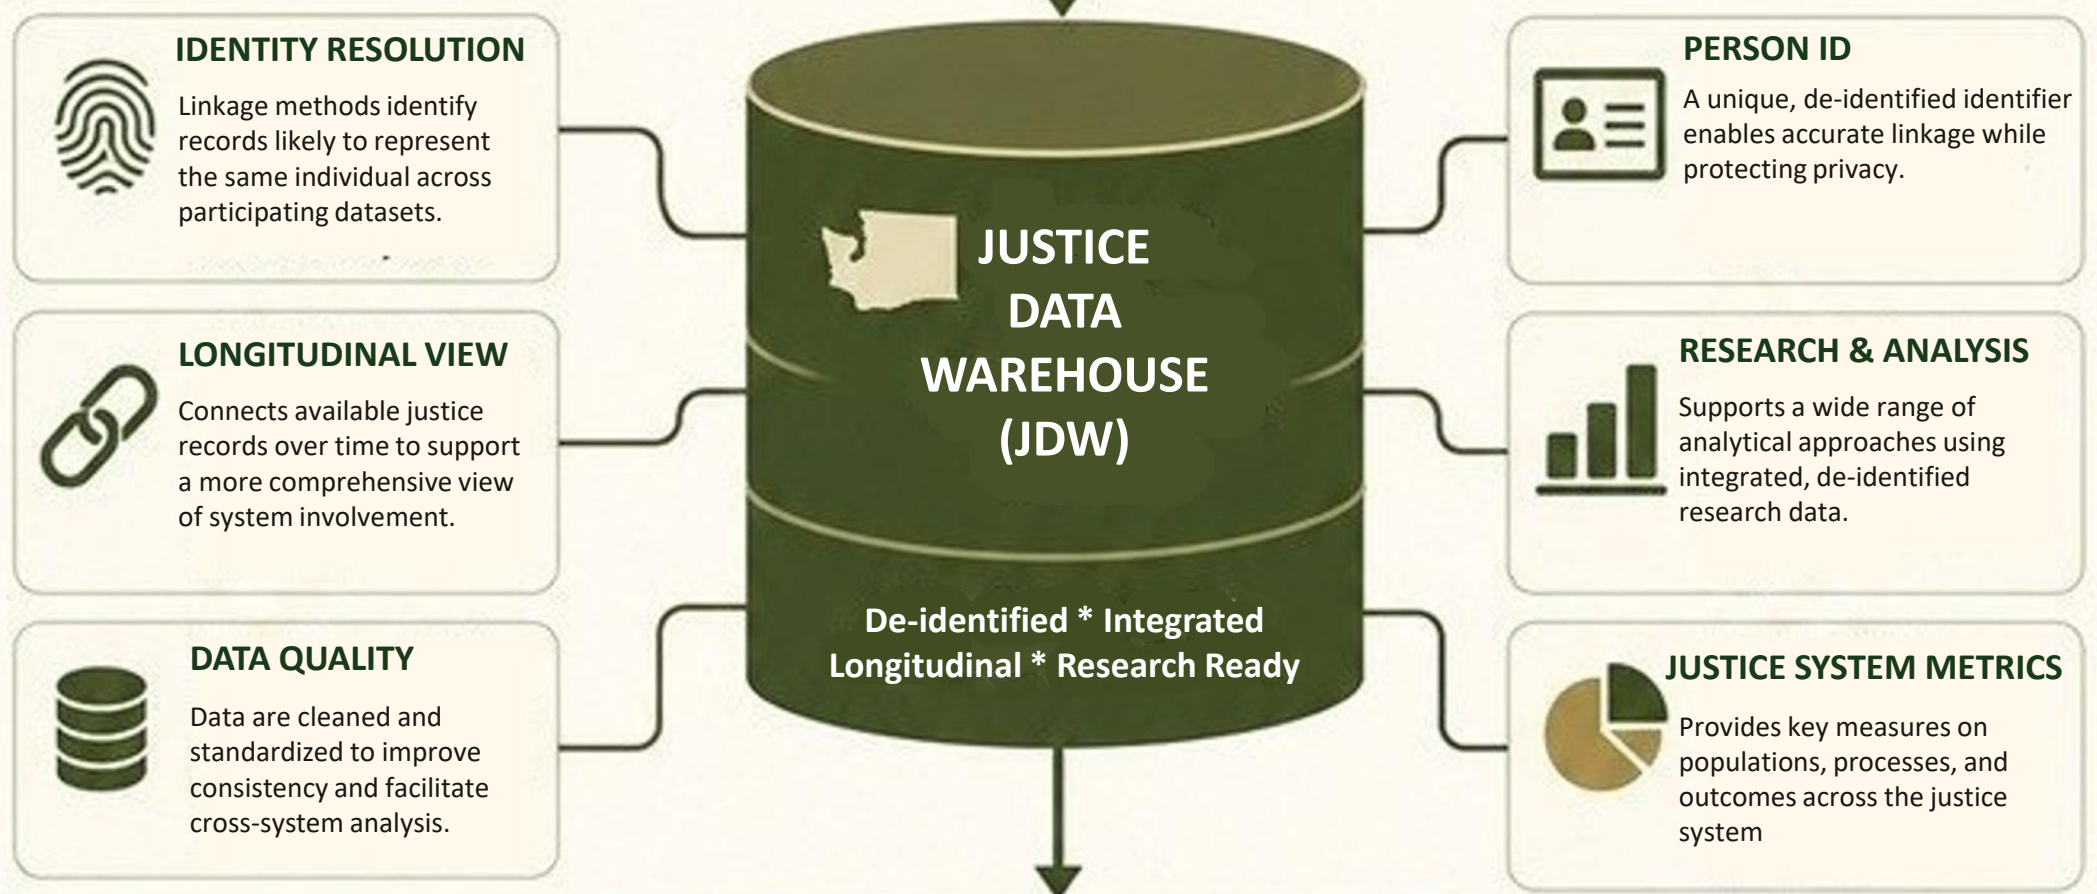

Caseload Forecast Council (CFC) Judgment and Sentencing (J&S)

Washington State Department of Corrections (WA DOC)

THE JDW ADVANTAGE:

- ✓ Integrated data from multiple systems
- ✓ Longitudinal insights across time
- ✓ Research-enabled and well-documented
- ✓ Stronger evidence to inform Washington

POWERING RESEARCH, POLICY, AND TRANSPARENCY

RESEARCH

Supports academic and applied research to understand trends and outcomes.

POLICY EVALUATION

Supports evaluation of programs, policies, and practices.

STATISTICAL MODELING

Enables advanced statistical and longitudinal analysis to support decision-making.

LEGISLATIVE REPORTS

Provides timely reports to inform legislators and public policy.

COLLABORATION

Enables agencies and researchers to examine questions spanning the justice system.

BETTER INFORMATION. BETTER DECISIONS. BETTER OUTCOMES. SAFER COMMUNITIES.

Washington State Office of Financial Management

DE-IDENTIFIED
Direct identifiers are removed

SECURE
Built with strong security controls.

INTEGRATED
Data sources connected

LONGITUDINAL
History over time supports analysis.

RESEARCH-ENABLED
Curated and documented for responsible research.
